

Juan José Maya

Full-Stack Developer

Colombia (remote) · juanjosemaya2510@gmail.com · +57 301 439 4180 · juanmaya25.github.io · github.com/Juanmaya25

PROFILE

Self-taught full-stack developer (3+ years). I build complete business systems companies use daily: database design, REST APIs, React/Angular frontends and deployment. 6 systems published with live demos. Strong in data engineering and Python automation.

PROJECTS (all with live demos at juanmaya25.github.io)

- **StockPro**

Inventory & POS: live KPIs, sales with automatic stock deduction, critical-stock alerts. React · TypeScript · Laravel · MySQL.

- **Seguridad y Salud MCM**

Corporate site delivered to a real client, in production and in use.

- **VetSystem**

Veterinary clinic management: patients, appointments, pharmacy alerts, medical history.

- **AgendaPro**

Booking platform for salons & spas: reservation wizard, calendar, loyalty program.

- **ContaFácil**

SME accounting: categorization, invoicing, real-time balance, P&L reports.

- **RentTrack**

Rental management: properties, payment tracking, maintenance, occupancy reports.

STACK

Frontend: React, Angular, TypeScript, JavaScript, HTML/CSS, Vite · Backend: Laravel/PHP, Python, REST APIs · Data: MySQL, PostgreSQL, Pandas · Other: Git, Linux, automation, Three.js

ALSO

Quantitative data engineering: built my own backtesting & statistical validation engine in Python (walk-forward, Monte Carlo, multiple-testing correction) running 24/7 on a Linux VPS. Languages: native Spanish, working English.
